

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name                                  | Project Description   | Country          | Species                      |
|--|---|---|------------------|------------------------------|
| Administrators of the Tulane Educational Fund                | Conserving Papua New Guinea Grasslands        | Conserving grassland and savanna in Papua New Guinea by providing local residents with the technical skills and information they need to wisely manage this diverse, highly threatened habitat.   | Papua New Guinea | White-shouldered Fairy-wrens |
| African People & Wildlife Fund                               | Maasai Steppe Big Cats Conservation           | Working with local communities to reduce lion-livestock conflict with environmentally-friendly livestock enclosures called living walls. Protecting vital habitat for big cats, while engaging local Maasai people through environmental education, community outreach, natural resource management, and sustainable enterprise development programs.   | Tanzania         | African Lions                |
| African Wildlife Conservation Fund                           | Conserving Zimbabwe's Endangered Wild Dogs    | Protecting wild dogs in and around Gonarezhou, Zimbabwe by addressing issues of habitat connectivity, conflict with humans, and effectiveness of buffer zones. Studying large carnivore conservation and dispersal, initiating a reporting system for local people to share carnivore sightings, and de-snaring injured African wild dogs and other large carnivores. Continuing school-based conservation awareness efforts in nearby primary schools. | Zimbabwe         | Painted Dogs                 |
| American Museum of Natural History                           | Coastwatch Grizzly Bear Monitoring Initiative | Expanding scope of grizzly bear monitoring to better understand geography and movement of bears beyond Koeys, Canada. Working with local partners to revitalize native salmon food fisheries in key drainages within the proposed bear sanctuary.   | Canada           | Grizzly Bears                |
| Andean Cat Alliance (Care of: Wildlife Conservation Network) | Andean Andean Cats and Local Communities      | Engaging local Argentinian communities in Andean cat conservation to ease pressures on this endangered species. Preserving biodiversity through the creation of conservation-friendly projects such as ecotourism.  | Argentina        | Andean Cats                  |
| Anza-Borrego Foundation                                      | Peninsular Bighorn Sheep Volunteer Count      | Supporting the 45th annual volunteer count of Peninsular Bighorn Sheep, native to Anza-Borrego Desert State Park which informs the California State Parks Department's decisions regarding resource allocation, conservation and land acquisition. Expanding public education and outreach through a K-12 distance learning program, a sleepover camping week, a Junior Ranger afterschool program, and ranger talks.                                   | United States    | Peninsular Bighorn Sheep     |
| Archbold Expeditions   | Restoring Habitat for Gopher Tortoises        | Examining tortoise population recovery and social structure in habitats being restored with prescribed fire. Immersing local college students in wildlife research, hosting "Tortoise Tracker" events for families, and providing educational activities for young summer camp participants.  | United States    | Gopher Tortoises             |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name  | Project Description   | Country       | Species                                  |
|--|---|---|---------------|--|
| Association LAST (Latin American Sea Turtles) (Care of: Wider Caribbean Sea Turtle Conservation Network) | Community-based Sea Turtle Conservation                                     | Combining scientific research with outreach and education to achieve a sustainable sea turtle conservation program in Pacuare, north Caribbean of Costa Rica. Training local community members, volunteers and students, providing environmental education for schools, and developing alternatives to minimize anthropogenic threats.  | Costa Rica    | Leatherback, Green and Hawksbill Turtles |
| Association of Zoological Horticulture   | AZH Plant Conservation Grant Program  | Awarding funds to qualified plant conservation programs to AZH members on an annual basis.  | Global        | Multiple Species                         |
| Association of Zoos and Aquariums  | CGF- Above the Surface: Lifting Lake Sturgeon Conservation into Public View | Monitoring reintroduced lake sturgeon through acoustic tagging in the Tennessee River. Engaging river cruise guests in education and real-time fish tracking and data collection, and using results to expand monitoring coverage.  | United States | Lake Sturgeon                            |
| Association of Zoos and Aquariums  | CGF- Closing the Gap to Conserve Golden Lion Tamarins                       | Planting native tree corridors to connect forest fragments and provide suitable habitat for golden lion tamarin monkeys in Brazil. Training local leaders to teach communities about their connection to the forest.  | Brazil        | Golden Lion Tamarin                      |
| Association of Zoos and Aquariums  | CGF- Community Outreach in Support of Vaquita Conservation                  | Working with fishing communities to expand a community-based conservation curriculum for middle and high school students. Testing a new vaquita survey technique using drones that will provide more cost-effective and scientifically-valid population estimates of the vaquita than are currently available.  | United States | Vaquita                                  |
| Association of Zoos and Aquariums  | CGF- Conservation of At-Risk Butterflies in South Florida                   | Building capacity at Zoo Miami to play a collaborative and strategic role in butterfly conservation efforts. Training staff in best practices of facilities management and operations, conservation breeding and population monitoring. Supporting existing species recovery efforts, facilitating development of new programs and enhancing community conservation engagement and understanding. | United States | Butterflies                              |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                 | Project Name   | Project Description   | Country       | Species                                   |
|-----------------------------------|--|---|---------------|---|
| Association of Zoos and Aquariums | CGF- Determining the Impact of Environmental Conditions on the Fertility of the Endangered Black-Footed Ferret | Comparing the health and reproductive traits of wild and captive black-footed ferrets to determine how environmental conditions impact fertility. Determining how to reduce the effects of environment on breeding black-footed ferrets in captivity.   | United States | Black-Footed Ferrets                      |
| Association of Zoos and Aquariums | CGF- Evaluating the Reproductive Biology of the Critically Endangered Hicatee Turtle                           | Training local personnel and installing infrastructure to improve captive breeding of critically endangered Central American river turtles (Hicatee turtles) in Belize.   | Belize        | Central American River Turtles            |
| Association of Zoos and Aquariums | CGF- Investigating Effects of Lead-Poisoning and Stress on California Condor Recovery                          | Examining how lead exposure and stress impacts recovery of California condor populations. Providing information to the condor recovery program to help improve treatment and minimize stress, and ultimately improve survival of wild birds.  | United States | California Condors                        |
| Association of Zoos and Aquariums | CGF- Monitoring Long-Term Success of Bog Turtle Releases with Genetics and Telemetry                           | Evaluating the long-term conservation impacts of a captive breeding program for bog turtles to determine if turtle breeding and survival are improved. Determining the possibility of expanding the program based on results.   | United States | Bog Turtles                               |
| Association of Zoos and Aquariums | CGF- Renewing Hope: Identifying Factors that Mediate the Survival of Panamanian Golden Frog                    | Surveying populations of golden frogs in western Panama that have survived outbreaks of a fungal disease. Learning what factors helped these populations to survive while others did not.   | Panama        | Golden Frogs                              |
| Association of Zoos and Aquariums | CGF- Southern Madagascar's Lemur and Tortoise Biodiversity Preservation  | Linking conservation and community needs for protection of radiated tortoises and ring-tailed lemurs in southern Madagascar. Creating a sustainable community-based conservation program focusing on in-situ conservation, protection and preservation. Providing combinations of green technology and local resources and implementing alternative agriculture technology to enhance the community's livelihood. | Madagascar    | Ring-Tailed Lemurs and Radiated Tortoises |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                 | Project Name   | Project Description   | Country                    | Species  |
|-----------------------------------|--|---|----------------------------|--|
| Association of Zoos and Aquariums | CGF- Uniting People Globally for Wildlife Conservation                                       | Uniting communities in Mongolia and Colorado for wildlife conservation by increasing knowledge through environmental exploration, providing hands-on life experiences, and promoting positive attitudes and behaviors towards wildlife. Creating educational materials and providing opportunities for teacher training, service learning, and an exchange program.       | Mongolia and United States | Communities  |
| Association of Zoos and Aquariums | CGF- Detecting Emerging Pathogens (Ranaviruses) in Captive Animals and the Live Animal Trade | Testing methods for detection of emerging viruses in amphibians, reptiles, and fish (Ranaviruses). Creating guidelines for screening amphibians in captivity and trade to reduce the spread of viruses.   | United States              | Amphibians   |
| Association of Zoos and Aquariums | CGF- Diagnosing, Monitoring, and Treating Tuberculosis in Asian Elephants                    | Studying tuberculosis in Asian elephant populations. Informing the development of new diagnostic tests and treatment monitoring tools that will help improve management of the disease in elephants.  | United States              | Asian Elephants  |
| Atlanta-Fulton County Zoo         | Guatemalan Endangered Reptile Awareness Program  | Increasing awareness of Guatemala's most endangered reptiles through expanded local education programs and use of research facility, radio-tracking programs, and the Arbonia Center for education and reptile breeding/headstarting. Building local capacity through training programs for local public institution employees and student field trips to research sites. | Guatemala                  | Guatemalan Beaded Lizards, Campbell's Alligator Lizards, Frost's Alligator Lizards |
| Audubon Alaska                    | Birds `n` Bogs: Conserving Bird Habitat  | Involving and educating urban residents in monitoring their "backyard" bogs and gaining an understanding of their importance for several declining bird species in Alaska. Offering workshops to train citizen scientists and family-friendly events to celebrate local Important Bird Areas and introduce families to a new outdoor activity they can enjoy together.    | United States              | Rusty Blackbirds   |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name              | Project Name                                     | Project Description  | Country       | Species                   |
|--------------------------------|--|--|---------------|---------------------------|
| Audubon Connecticut            | Urban Oases for Migrating Songbirds              | Identifying improving, and conserving important stopover habitat for migrating songbirds in urban landscapes in North America. Using a combination of community-based land stewardship, demonstration gardens, citizen science, and innovative education programs to create a replicable model for community-based conservation.   | United States | Golden-winged Warblers    |
| Audubon Florida                | Jay Watch: Audubon Citizen Science               | Training and deploying more than 250 citizen scientists in 19 counties to collect breeding success data for the endemic and endangered Florida scrub-jay. Supporting scrub-jay research and population assessments.  | United States | Florida Scrub-jays        |
| Bat Conservation International | Conserving Venezuela's Critically Endangered Bat | Providing scientific evidence to expand the protected area for the critically endangered Paraguana mustached bat in Venezuela. Building community support through awareness programs and initiating locally-supported conservation and management planning to ensure the species' future.  | Venezuela     | Paraguana Moustached Bats |
| Bat Conservation International | Filipinos for Flying Foxes                       | Protecting tree roosting sites used by the endangered golden-capped fruit bat in the Philippines. Continuing targeted education campaigns in nearby communities to reduce the hunting of bats and prevent conflict between bats and farmers, and generate support for locally-managed roost sanctuaries.   | Philippines   | Golden-capped Fruit Bats  |
| Bat Conservation International | Saving a Key Mexican Pollinator                  | Studying ecological criteria of breeding roosts being used by the Mexican long-nosed bat in central Mexico. Protecting roosts through education and outreach programs and building support among leaders within the local cave tourism and agricultural industry to reduce negative impact on the bats.  | Mexico        | Mexican Long-nosed Bats   |
| Bat Conservation International | Saving Guinea's Hidden Horseshoe Bat             | Laying the foundation for a sustainable, locally-led conservation initiative to protect the endangered Maclaud's horseshoe bat and its threatened cave roosts and adjacent habitats. Focusing on roost protection, capacity building, and community education that targets both schoolchildren and community leaders.  | Guinea        | Maclaud's Horseshoe Bats  |
| BirdLife International         | Conserving the Endangered Marsh Seedeater        | Researching ecological requirements and implementing habitat conservation measures on state-owned land in Uruguay to protect the endangered marsh seedeater bird. Engaging local communities and involving rural school children in an educational grassland biodiversity monitoring program to teach biodiversity knowledge and concepts, and provide first-hand experience of the conservation importance of the area. | Uruguay       | Marsh Seedeaters          |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name                                   | Project Description  | Country        | Species  |
|--|--|--|----------------|--|
| Central Caribbean Marine Institute                                     | Enhancing Recovery of Threatened Corals        | Engaging communities in studying and mapping the genetic diversity of wild staghorn coral colonies throughout the Cayman Islands. Integrating new data into an education program and building a diverse staghorn coral nursery to transplant and enhance the local wild population and promote natural recovery.   | Cayman Islands | Staghorn Corals  |
| CERCOPAN   | Rainforest School Tree Nursery                 | Raising awareness of the value of wildlife in Nigerian rainforests and encouraging sustainable actions in a new generation. Engaging local schools in establishing mango tree nurseries, using saplings to mark protected forest area, and offering a source of sustainable income through sale of plants. Providing education curriculum and materials relating to primate and rainforest conservation.     | Nigeria        | Red Capped Mangabeys (+12 other threatened primates)                           |
| Cheetah Conservation Botswana (Care of: Wildlife Conservation Network) | Community Education for Carnivore Conservation | Reducing carnivore-livestock conflicts and improving land management practices in Botswana through community interventions, farmer training workshops, a livestock guarding dog network, youth bush camps, and conflict reduction demos in the Western Kalahari. Scaling up a community network that provides information and support to improve livelihoods while protecting cheetahs and other carnivores. | Botswana       | Cheetahs   |
| Cheetah Conservation Fund  | Future Farmers of Africa                       | Implementing agricultural, ecological and economic training in Namibian communities to enhance Namibian livelihoods. Reducing conflict between farmers and cheetahs, promoting conservation education and eco-friendly development to protecting ecosystems for cheetahs and other wildlife.   | Namibia        | Cheetahs   |
| Chicago Zoological Society   | Bridging the Dolphin Conservation Gulf         | Implementing a collaborative identification catalog for coastal Mexico, Cuba, and the US to define ranges of bottlenose dolphins and identify exposure and responses to threats. Educating the public and grade school children about dolphin conservation issues through video displays and classroom visits highlighting individual dolphin stories.   | United States  | Bottlenose Dolphins  |
| Chicago Zoological Society   | Building Bridges: Punta San Juan               | Engaging the community of Peru's Punta San Juan marine reserve in conservation through monthly family and school reserve tours and a guide training program for local teens. Hosting community events to foster the development of local conservation leaders while relating the importance of wildlife and ecosystem conservation worldwide.  | Peru           | Humboldt Penguins, Peruvian South American Fur Seals, South American Sea Lions |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                          | Project Name                                    | Project Description  | Country       | Species  |
|--|---|--|---------------|--|
| Coastal Bend Bays & Estuaries Program      | Lagunas Unidas!                                 | Researching the importance of lagoon systems in tropical and subtropical latitudes for migratory birds. Expanding and strengthening the network of biologists, communities, and wetlands that are critical for conservation of birds throughout Mexico.  | Mexico        | Red Knots, Reddish Egrets, Piping Plovers            |
| Coastal Plains Institute                   | Building Communities that Conserve Wetlands     | Building on an existing project to save the rare striped newt by combining education standard-aligned activities and citizen scientist training to conserve the biodiversity of wetlands in Florida. Providing experiential learning opportunities for students and other citizens to collect essential ecological data from wetlands, increasing local environmental literacy and helping to detect future declines of amphibian species. | United States | Striped Newts, Gopher Frogs, and 17 other amphibians |
| Conservation Fusion                        | Madagascar: Planting Seeds of Change            | Engaging the Kianjavato community in education focusing on extinct lemurs, Madagascar's history, and the island's unique biodiversity. Highlighting how the past shapes the future while promoting conservation action by planting trees to reforest habitat for lemurs.   | Madagascar    | Lemurs, Multiple Species                             |
| Conserve Wildlife Foundation of New Jersey | Piping Plover Conservation - Abaco, Bahamas     | Identifying critical wintering habitat for piping plovers on Abaco and Eleuthera, Bahamas. Engaging the public to increase awareness of the critical role the Bahamas plays in the piping plover life cycle. Building local capacity to conduct surveys and direct conservation efforts.   | The Bahamas   | Piping Plovers                                       |
| Conserve Wildlife Foundation of New Jersey | Assessing Piping Plover Migratory Stopovers     | Identifying and quantifying high-use piping plover migration stopovers in New Jersey, Rhode Island, and Virginia. Assessing disturbance impacts to help protect critical habitats for piping plovers and other shorebirds.   | United States | Piping Plovers                                       |
| Coral Restoration Foundation               | Developing Elkhorn Coral Restoration Techniques | Engaging volunteers to maintain offshore coral nurseries and transplant corals onto degraded reefs off of Key Largo, Florida. Developing restoration techniques for elkhorn coral by transplanting at least 380 nursery-grown elkhorn colonies on two sites.   | United States | Elkhorn Coral  |
| Cornell University                         | Agroecosystems for Communities and Conservation | Identifying agricultural practices that both conserve birds and promote sustainable communities in Guatemala. Improving wildlife habitat and human nutrition with a fruit tree program, and building local conservation capacity through education.  | Guatemala     | Multiple Birds                                       |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                                    | Project Name                                  | Project Description   | Country       | Species               |
|--|---|---|---------------|-----------------------|
| Durrell Wildlife Conservation Trust                  | Reintroduction of the Ploughshare Tortoise    | Reintroducing ploughshare tortoises to establish a self-sustaining population at Beaboaly, Madagascar. Contributing to a larger recovery plan that includes protection of wild populations by local communities, captive-breeding, education, and regional partnerships to save the tortoise and its habitat.   | Madagascar    | Ploughshare Tortoises |
| East Coast Zoological Society                        | Oyster Restoration in Mosquito Lagoon         | Researching and restoring oyster reefs in the Mosquito Lagoon, Florida. Engaging local people in a community based restoration project, providing hands-on conservation opportunities, community outreach programs and workshops, and increasing ecosystem diversity through restored oyster reefs.   | United States | Eastern Oysters       |
| ECOLIFE Conservation                                 | Bwindi Gorilla Community Conservation Project | Protecting endangered mountain gorilla habitat and improving the quality of life for communities surrounding Uganda's Bwindi Impenetrable National Park. Promoting the adoption of clean, fuel-efficient stoves to protect mountain gorillas, while also linking the use of these stoves to conservation, health and economics.   | Uganda        | Mountain Gorillas     |
| Ecostudies Institute                                 | Bringing Back the Western Bluebird: Phase II  | Re-establishing breeding populations of the migratory Western bluebird to the Puget Lowlands through reintroduction. Developing a management and monitoring plan that incorporates citizen participation and uses the iconic bluebird to educate and create connections between the public and species and habitat recovery.  | United States | Western Bluebirds     |
| Environmental Protection in the Caribbean            | Towards Black-capped Petrel Conservation      | Surveying black-capped petrels in Dominica, Dominican Republic, and Haiti to identify critical nesting areas and population changes. Increasing knowledge of black-capped petrel ecology and conservation needs among local community members through media, events, school curriculum and training.  | Dominica      | Black-capped Petrels  |
| Ewaso Lions (Care of: Wildlife Conservation Network) | Lion Kids Camp / Lion Watch                   | Teaching Kenyan primary students about wildlife, carnivores, and the importance of conservation through Lions Kids Camp, an immersive four-day experiential learning camp. Collecting lion data to improve conservation and research efforts through Lion Watch, a program that uses the knowledge and exposure of local safari tour guides and their guests.                   | Kenya         | African Lions         |
| Fair Trade USA                                       | Bringing Fair Trade to Fisheries              | Completing the first pilot of Fair Trade's Capture Fisheries Standards in Indonesia with 250 fishermen who will use hand line methods to catch yellowfin tuna. Monitoring and evaluating the challenges and successes of Fair Trade implementation so this model can be scaled and replicated to other locations. Identifying 2-3 new fisheries for certification in 2014-2015. | Indonesia     | Yellowfin Tuna        |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                                     | Project Description  | Country             | Species   |
|---|--|--|---------------------|---|
| Fanjingshan National Nature Reserve (Care of: San Diego Zoo Global) | Conserving Endangered Guizhou Snub-nosed Monkeys | Strengthening species and habitat conservation of Guizhou snub-nosed monkeys in China's Fanjingshan Nature Reserve by conducting scientific research, building the technical capacity of local reserve staff and wildlife biologists, and educating local children about local wildlife species and habitats.  | China               | Snub-nosed Monkeys  |
| Farallones Marine Sanctuary Association                             | LIMPETS  | Involving middle school and high school students in meaningful scientific work including field investigations of marine life in California's coastal areas. Collecting long-term data that directly impacts the conservation and management of these areas.  | United States       | 33 rocky intertidal species and 1 sandy beach species                                       |
| Fauna & Flora International   | Conservation of the Ustyurt Saiga                | Monitoring movement patterns on the Ustyurt saiga antelope using GPS technology and promoting environmental awareness and greater understanding of biodiversity in local communities. Combating illegal hunting of and trade in saiga by working with law enforcement agencies to introduce new technologies and best practice deterrence tactics.                                 | Kazakhstan          | Saiga Antelopes   |
| Fauna & Flora International   | Eastern Caribbean Offshore Islands Network       | Fostering regional cooperation and building national capacity to restore, conserve and manage island biodiversity in the Eastern Caribbean, and halt the loss of endemic species. Focusing research, conservation, and education efforts on Antigua and Barbuda, Anguilla, Barbados, Saint Lucia and at least 20 satellite islands which support globally threatened biodiversity. | Antigua and Barbuda | Antiguan Racers; Hawksbill Sea Turtles, Leatherback Sea Turtles and 7 other reptile species |
| Fauna & Flora International   | Ensuring the Future of Siamese Crocodiles        | Protecting and recovering the Siamese crocodile through applied field research, strengthening and establishing community-managed sanctuaries, and educating key stakeholders. Reinforcing existing wild populations with rescued and captive-bred stock.   | Cambodia            | Siamese Crocodiles  |
| Felidae Conservation Fund   | Bay Area Puma Project                            | Addressing increasing human-puma conflict and puma population extinction risk in the San Francisco Bay Area through field research, community education and conservation programs. Using scientific data to inform education and outreach efforts in local communities and schools.  | United States       | Pumas   |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                                     | Project Description   | Country       | Species                     |
|---|--|---|---------------|-----------------------------|
| Fundacion para la Conservacion de los Andes Tropicales (Care of: Administrators of the Tulane Educational Fund) | Umbrellabird Conservation in the Choco           | Combining scientific research, training and education to achieve lasting conservation of northwest Ecuador's rainforests. Focusing on the importance of privately owned forest fragments for the conservation of the long-wattled umbrellabird.   | Ecuador       | Long-wattled Umbrellabirds  |
| Garden Island Resource Conservation & Development   | Restoring Hawaiian Endangered Bird Habitat       | Monitoring the results of the removal of invasive plants from a core habitat area for rare birds and insects in Hawaii. Involving the public in conservation action and documenting changes in bird abundance, foraging and nesting behavior related to efforts to improve habitat quality for endangered species.  | United States | `Akikiki, Akeke`e, Puaiohis |
| Grevy's Zebra Trust (Care of: Saint Louis Zoo Association)  | Grevy's Zebra Conservation Outreach, Kenya       | Working with local communities to conserve the endangered Grevy's zebra and habitat in Kenya. Employing local people in three regions , enhancing conservation outreach with elders, women, warriors, and schoolchildren through workshops and film nights and supporting community-led committees to implement local conservation action benefiting Grevy's zebra and other wildlife.              | Kenya         | Grevy's Zebras              |
| Groupe d'Etude et de Recherche sur les Primates de Madagascar (Care of: Houston Zoo)                            | Protecting Endangered Crowned Sifaka Populations | Establishing participatory ecological monitoring to protect the endangered crowned sifaka (primate) and its habitat in the central highlands of Madagascar. Engaging local people in conservation and education to reduce pressure on forest resources for people and wildlife.   | Madagascar    | Crowned Sifakas             |
| Gunung Palung Orangutan Conservation Program  | Orangutan Research, Conservation and Education   | Conserving a vital population of Bornean orangutans and forest habitat in and around Gunung Palung National Park, Indonesia. Determining long-term orangutan population viability and the impact of human encroachment. Raising awareness to inspire environmental stewardship and protect forest areas surrounding the national park and developing alternative livelihoods for local communities. | Indonesia     | Orangutans                  |
| Health In Harmony   | Conserving Gunung Palung National Park           | Engaging communities in conserving Gunung Palung National Park through the provision of high quality, low-cost healthcare services. To ensure the future health of both local villagers and the park's large orangutan population, ASRI Kids helps children connect with nature and learn to live sustainably, and ASRI Reforestation aims to re-green key areas of the park.                       | Indonesia     | Orangutans                  |

| Organization Name  | Project Name   | Project Description   | Country      | Species  |
|--|--|---|--------------|--|
| Instituto de Pesquisas Ecologicas (IPE) (Care of: Houston Zoo) | Lowland Tapir Conservation Initiative (LTCI): Pantanal | Gathering scientific data to support the development and implementation of conservation action plans for tapirs and their habitat in Brazil. Using tapirs as a flagship species to catalyze habitat conservation, education, outreach, training and tourism initiatives.  | Brazil       | Lowland Tapirs                                   |
| Instituto de Pesquisas Ecologicas (IPE) (Care of: IDEA WILD)   | BLT Conservation in a Fragmented Landscape             | Conducting field research on black lion tamarin monkeys in five small habitat fragments, and providing environmental education in local communities. Establishing groundwork for management and conservation actions, and raising people's commitment to conservation through outreach, education, and participatory management action planning.  | Brazil       | Black Lion Tamarins                              |
| Integrated Conservation  | Orangutan Conservation Through Community Engagement    | Protecting the Bornean orangutan by safeguarding Wehea Forest in Indonesia. Engaging the Wehea Dayak people and conducting cutting edge research, changing paradigms through innovative education programs and fostering sustainable development through a research center and ecotourism program.  | Indonesia    | Bornean Orangutans                               |
| International Crane Foundation                                 | Cranes and Wetlands - South Africa                     | Increasing and securing the breeding numbers of South Africa's critically endangered wattled cranes and vulnerable blue and grey crowned cranes through the protection of the Hlatikulu catchment. Securing commitment of local farmers and community members to act as ongoing custodians of the country's biodiversity through a Biodiversity Stewardship Program.  | South Africa | Wattled Cranes; Blue Cranes; Grey Crowned Cranes |
| International Crane Foundation                                 | Sustainable Wetlands in the Mekong                     | Protecting remnant wetlands in the Mekong Delta by linking natural resources provided by the wetlands to the people who live near the wetland. Sustainably harvesting native vegetation to manufacture woven goods, which local people sell in the market to improve their livelihoods. Supporting both good-paying jobs and wetland conservation of the native ecosystem upon which these jobs depend.   | Vietnam      | Eastern Sarus Cranes                             |
| International Fund for Animal Welfare                          | Saving the Elephants of Amboseli                       | Partnering with the local Maasai community to provide long-term protection for the elephants in Amboseli National Park in Kenya. Increasing education and awareness in local communities, developing plans for long-term investment in community projects that will ensure ongoing benefit to the community, securing critical dispersal areas and corridors, and supporting the efficient and effective administration and management of the park. | Kenya        | African Elephants                                |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                     | Project Name                               | Project Description   | Country                | Species                  |
|---------------------------------------|--|---|------------------------|--------------------------|
| International Fund for Animal Welfare | Sharing Space with China's Elephants       | Working with local Chinese communities to provide the means and incentives to engage in the conservation of wild elephants. Assisting the government in developing and implementing habitat management and conservation initiatives for Asian elephants.  | China                  | Asian Elephants          |
| International Iguana Foundation       | Anegada Iguana Recovery Program            | Studying the distribution and ecology of wild and headstarted Anegada iguanas in the British Virgin Islands using camera traps and other methods. Hosting an annual Iguana Festival to educate local communities about iguanas and the benefits of iguana and ecosystem conservation.   | British Virgin Islands | Anegada Iguanas          |
| International Rhino Foundation        | Black Rhino Conservation in Zimbabwe       | Maintaining black rhino population growth in Zimbabwe by supporting emergency veterinary interventions, as well as monitoring and management, including treatment of injuries, translocations from unsafe areas, and fitting of radio transmitters. Aiding in rescue and rehabilitation of orphaned rhino calves for release back into the wild.  | Zimbabwe               | Black Rhinoceros         |
| International Snow Leopard Trust      | Protecting India's Endangered Snow Leopard | Building on comprehensive conservation efforts in the Indian Himalayas in a region that established community-based conservation programs, collected vast amount of data, and increased collaboration with the government to benefit snow leopards. Expanding upon these efforts to raise awareness among new stakeholders, launch new research and pilot new community programs.       | India                  | Snow Leopards            |
| Jane Goodall Institute                | Release of Wild Born Mandrills             | Releasing eight wild-born mandrills into the wild in Conkouati-Douli National Park, Congo, following IUCN reintroduction guidelines. Monitoring released mandrills with telemetry devices for up to one year to ensure a successful reintroduction. Increasing knowledge and respect for the wildlife laws pertaining to mandrills in communities neighboring CDNP and in Pointe Noire. | Republic of Congo      | Mandrills                |
| Jekyll Island Foundation              | Capacity Building for Marine Turtles       | Improving and enhancing sea turtle protection and rehabilitation, and supporting nesting beach management and research. Expanding education efforts through training in the US and Costa Rica, in-country teacher workshops, enhancing a distance learning program and an exhibit at the Parque Marino Del Pacifico.  | Costa Rica             | Olive Ridley Sea Turtles |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                                    | Project Description  | Country       | Species   |
|---|---|--|---------------|---|
| Leatherback Trust   | Conservation of Pacific Leatherback Turtles     | Implementing strategies to protect the leatherback turtle from extinction along the Pacific coast of Costa Rica. Incorporating scientific research, conservation, and community education to promote sustainable resource use and support for protected areas.   | Costa Rica    | Leatherback Sea Turtles                             |
| Lincoln Park Zoological Society                                 | Goualougo Triangle Ape Project (GTAP)           | Implementing long-term applied conservation research of Western lowland gorillas in the Congo Basin, combined with efforts to protect habitat and strengthen local capacity. Evaluating and minimizing the impacts of logging, identifying mechanisms of disease spread, decreasing poaching pressure, and inspiring Congolese conservationists.   | Congo         | Western Lowland Gorillas                            |
| Little Fireface Project (Care of: Cleveland Zoological Society) | Javan Loris Community Conservation Project      | Conducting ecological studies of wild Javan slow lorises (small, nocturnal primates) to inform release projects. Using media and workshops to educate international audiences and reduce trade of slow lorises as exotic pets.   | Indonesia     | Javan Slow Loris'                                   |
| Los Angeles Audubon Society                                     | Least Tern & Shorebird Conservation             | Building on established conservation programs to protect and preserve habitat for least tern and Western snowy plover birds. Educating public school students and the general public about these shorebirds and the importance of habitat conservation.  | United States | Least Terns   |
| Mangrove Action Project   | Mangrove Curriculum Transfer to Bangladesh      | Expanding, translating, and adapting the Mangrove Action Project's innovative education program for audiences in Bangladesh. Using the Marvelous Mangroves Teachers' Resource Guide to teach the community about mangrove ecology, the Sundarbans and climate change impacts.  | Bangladesh    | Mangroves   |
| Marine Resources Development Foundation                         | Seagrass Surveys for Education and Conservation | Increasing permanent seagrass survey sites off Key Largo, Florida, in order to gain more baseline data on the seagrass ecosystems of the Florida Keys. Expanding the seagrass ecology educational program to engage visiting students from across the US to participate in seagrass surveys, analyze the data, and understand the importance of seagrass meadows to the tropical marine ecosystem. | United States | Manatees, Fish, Invertebrates, & 3 Types of Grasses |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                       | Project Name                                    | Project Description   | Country       | Species              |
|---|---|---|---------------|----------------------|
| Montana State University Foundation     | Mapping the Wolverine Way                       | Providing science-based information for land managers in Canada and the US to protect wolverines and key habitats. Working collaboratively with local organizations and youth to build citizen support for the conservation and management of wild areas and the landscape corridors that link them.  | Canada        | Wolverines           |
| Mote Marine Laboratory                  | Spotted Eagle Ray Conservation III              | Conducting research on the spotted eagle ray's genetics, behavior and ecology. Engaging Mexican researchers and stakeholders in conservation training and educational outreach. Establishing a shared database among AZA institutions to aid conservation efforts for this species.   | United States | Spotted Eagle Rays   |
| National Audubon Society                | Maine Seabird Conservation and Outreach         | Operating seasonal field camps with a focus on conservation action and observation to benefit puffin seabirds. Engaging 20 college-age interns and 50 volunteers in hands-on habitat improvement projects and providing hands-on place-based activities about seabirds for approximately 2,000 3-6th grade students in 25 mid-coast Maine schools.  | United States | Atlantic Puffins     |
| National Audubon Society                | Shorebird Conservation in the Bahamas           | Supporting protection of shorebird habitats in the Joulter Cays, Andros and The Berry Islands through government engagement, scientific investigation and community support. Building a constituency that supports the conservation of shorebirds and key habitats through education, awareness and development of economic opportunities through bird-based tourism.                         | The Bahamas   | Piping Plovers       |
| National Forest Foundation              | Silver Glen Springs Collaborative Conservation  | Working collaboratively with stakeholders including federal, state, and local agencies, boaters, businesses and conservation groups to craft a management plan for Silver Glen Springs, Florida. Increasing monitoring data to track the ecological health of the Springs and hosting a public awareness event at the Springs to connect users to the importance of the Springs for manatees. | United States | Florida Manatees     |
| Nature and Culture International        | Wildlife Trackers of Monte Mojino               | Employing youth and communities to protect critical tropical deciduous forest of Sonora, Mexico, and its endangered jaguar population. Providing community members with training from rangers and researchers to track jaguar and other wildlife populations.   | Mexico        | Jaguars              |
| New Jersey Academy for Aquatic Sciences | Conservation of Endangered Banggai Cardinalfish | Assessing abundance, eradication levels, collection pressure and habitat degradation of the Banggai cardinalfish. Using this information to inform a recommendation for protection to Indonesian authorities.   | Indonesia     | Banggai Cardinalfish |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                                     | Project Description   | Country                      | Species                      |
|---|--|---|------------------------------|------------------------------|
| New Jersey Audubon Society  | Conservation of Semipalmated Sandpiper           | Understanding the conservation status of semipalmated sandpiper shorebird along South America's Atlantic and Caribbean coast. Improving understanding of relationships among wintering, migrating and breeding populations and identify threats to this species' survival.  | Suriname                     | Semipalmated Sandpipers      |
| New Mexico Institute of Mining and Technology                       | Conservation of Panamanian Golden Frogs          | Identifying where and how remaining Panamanian golden frog populations are surviving in order to establish successful reintroduction programs. Expanding education and outreach events for Golden Frog Day and educating Panamanian families and teachers about the conservation challenges facing amphibians.  | Panama                       | Golden Frogs                 |
| New Nature Foundation   | Sustainable Innovations with Ugandan Communities | Addressing the energy needs of people living on the border of the Kibale National Park, Uganda, by utilizing sustainable eco-briquettes to address demand for fuel. Supporting science centers, traveling films and educational competitions to enhance environmental education. Demonstrating how indigenous trees can produce more wood, how fuel efficient stoves can save wood and how people-park relations can be improved.         | Uganda                       | Eastern Chimpanzees          |
| Nicholls State University   | Crane-Crab Conservation Coupling: 2014           | Continuing a comprehensive research and conservation program focusing on the critical coupling between cranes and blue crabs, the cranes' primary food source. Understanding relationships between crabs and cranes to develop conservation strategies, including reintroductions into historic ranges.   | United States                | Whooping Cranes & Blue Crabs |
| Northern Jaguar Project   | Northern Jaguar: Viviendo con Felinos            | Working closely with ranchers on properties adjacent to the 50,000-acre Northern Jaguar Reserve to minimize human-wildlife conflicts, reduce jaguar mortality, and build conservation alliances. Protecting and restoring habitat essential for the area's four large felines (jaguars, ocelots, mountain lions, and bobcats).  | Mexico                       | Jaguars                      |
| Okapi Conservation Project (Care of: Wildlife Conservation Network) | Community Support for Okapi Conservation         | Preserving the okapi and its habitat in the Democratic Republic of Congo by reducing the demand for bush meat and discouraging participation of young people in illegal activities like mining and poaching. Working with farmers' co-ops and women's groups to provide technical assistance, improving agriculture production and marketing, and increasing community welfare to promote long-term sustainable use of natural resources. | Democratic Republic of Congo | Okapis                       |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name                                 | Project Description   | Country   | Species              |
|--|--|---|-----------|----------------------|
| Painted Dog Conservation<br>(Care of: Wildlife Conservation Network) | PDC Anti-Poaching Units                      | Conducting daily anti-poaching patrols throughout Zimbabwe's Gwayi Conservancy and Hwange National Park buffer zones to protect African wild dogs and other wildlife over 10,500 square kilometers. Locating and dismantling snares set for wildlife in the bush, treating and freeing trapped animals whenever possible, and continuing community education efforts through the Iganyana Bush Camp Program and Conservation Clubs. | Zimbabwe  | African Painted Dogs |
| Pan African Sanctuaries Alliance                                     | PASA African Primate Conservation Program    | Building on existing sanctuary education programs and local relationships and coordinating a program to protect primates in sanctuaries across Africa. Collecting data on displaced primates, identifying at-risk habitats, training Ecoguards to patrol protected areas, and working with communities and governments to improve law enforcement.  | Africa    | African Primates     |
| Panthera   | China Snow Leopard Conservation Program      | Collaborating with local NGOs, nomads and monks to conserve the endangered snow leopard on China's Tibetan Plateau. Employing nomads in an ongoing camera trap study and purchasing additional cameras to increase data collection. Producing and distributing educational materials at a Buddhist Festival, and working with monasteries to expand a livestock insurance program to mitigate human snow-leopard conflict.          | China     | Snow Leopards        |
| Paso Pacifico  | Saving Nicaragua's Endangered Spider Monkeys | Working with farmers to restore forests for spider monkeys and employing community-based forest rangers to patrol forests and monitor primate populations. Engaging children in citizen science and experiential learning through a Junior Ranger program focused on spider monkeys, and building valuation of nature in the next generation of Nicaragua's environmental leaders.  | Nicaragua | Spider Monkeys       |
| Red Panda Network  | Red Panda Community Conservation Awareness   | Expanding a forest guardian program and youth education efforts for red panda conservation initiatives through partnerships with local organizations. Promoting organic and biodynamic farming practices to provide alternative and sustainable income opportunities as well as encourage long-term stewardship of local red panda habitat.   | Nepal     | Red Pandas           |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name                            | Project Description  | Country               | Species                            |
|--|---|--|-----------------------|------------------------------------|
| Reef Environmental Education Foundation (REEF)                                   | Grouper Moon: Conserving Nassau Grouper | Facilitating research on the largest and one of the last known spawning aggregations of the endangered Nassau grouper and the application of research findings to ensure long-term recovery and conservation of this Caribbean icon. Effort is integrated into established marine conservation effort in the Cayman Islands, the Grouper Moon Project. | Cayman Islands        | Nassau Grouper                     |
| Reef Relief  | Coral Reef Youth Education Program      | Linking personal and public actions through education and awareness to improve the health and ensure the survival of coral reefs in the Florida Keys and globally. Placing special emphasis on the role of education and youth education as the first step to saving these endangered marine ecosystems.   | United States         | Elkhorn Corals and Staghorn Corals |
| Renatura Congo (Care of: Wildlife Conservation Society)                          | Sea Turtle Conservation in Congo        | Continuing a program to address sea turtle bycatch in Congo by repairing fishing nets damaged in efforts to release accidentally-caught sea turtles. Facilitating an outreach program for children and the general public, and furthering a tourism project to benefit the coastal villages' community.  | Congo                 | Sea Turtles                        |
| Royal Society for the Protection of Birds (Care of: American Fund for Charities) | Removing Barriers to Eel Conservation   | Studying the critically endangered European eel, informing species recovery work, and increasing the connectivity of wetlands for eels at three RSPB reserves in the United Kingdom. Raising awareness and providing education in local communities and with stakeholders to increase support and active engagement in eel recovery.                   | United Kingdom        | European Eels                      |
| Royal Society for the Protection of Birds (Care of: American Fund for Charities) | Saving Sao Tome's Endemics              | Collecting data on the ecology and habitat of three critically endangered bird species to identify specific threats. Engaging local communities, raising hunters' awareness and reducing impacts from hunting, and refining the local management plan to improve protection and conservation for these species at priority sites.                      | Sao Tome And Principe | Dwarf Olive Ibises                 |
| Rutgers University Foundation  | Saving Orangutans with Local Partners   | Offering an environmental education program focused on orangutan conservation efforts in two new schools in the Mawas Reserve, Indonesia, and developing educational workshops and materials aimed at engaging the adults in the community. Providing employment at the research station as a sustainable alternative to forest exploitation.          | Indonesia             | Bornean Orangutans                 |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                                  | Project Description  | Country       | Species                           |
|---|---|--|---------------|-----------------------------------|
| Sacred Heart University<br>(Note: Request is for Project Limulus) | Project Limulus: A Community Research Program | Investigating the population dynamics of horseshoe crabs in Long Island Sound through collaborative research efforts involving federal, state, non-profit and community groups. Combining classroom and field work activities to help students of all ages learn science by doing science.   | United States | American Horseshoe Crabs          |
| Saint Louis Zoo Association                                       | St. Louis Box Turtle Project                  | Promoting conservation of urban and rural box turtles in the Saint Louis area through collaborations among the project's team of ecologists, animal health care specialists, and educators. Ensuring a strong base of field ecological and health science studies, and outreach opportunities for youth and adult audiences. Utilizing scientific research and education to connect people to the living world and inspire conservation actions. | United States | Three-toed Box Turtles            |
| Santa Barbara Zoological Foundation                               | California Condor Nest Guarding Program       | Adopting a formal adaptive management approach for condor conservation, monitoring breeding and nesting, and intervening where nesting problems exist in order to supplement the current population with wild-fledged chicks. Sharing research results with the public through exhibits and education programs to reduce human impacts on condor recovery.   | United States | California Condors                |
| Sarasota Bay Watch  | Community-Driven Scallop Restoration Program  | Engaging citizen scientists and volunteers, as well as local businesses, organizations and governments in a long-term, community-driven scallop restoration program to re-establish stable breeding populations in Sarasota Bay, Florida. Using this sustained collaborative effort as a model for other communities on Florida's West coast.  | United States | Bay Scallops                      |
| Save the Elephants (Care of: Wildlife Conservation Network)       | STE Elephants and Bees Project                | Conducting elephant behavioral and communication research to understand how elephants respond to bees, as well as developing new forms of tracking collars to provide real time data on key crop-raiding elephants. Working closely with rural farmers to test the effectiveness of beehive fences that reduce crop-raid damage and provide income through the sale of honey and bee products.   | Kenya         | African Elephants                 |
| SAVE THE FROGS!   | Saving Ghana's Endangered Squeaker Frog       | Restoring the habitat of a newly re-discovered and only known surviving population of Ghana's giant squeaker frog by involving local villagers in removing a non-native invasive weeds and replanting native trees. Increasing awareness to ensure relevant stakeholders understand the importance of protecting these frogs and other endangered frog species.  | Ghana         | Giant West African Squeaker Frogs |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name                              | Project Description  | Country       | Species                     |
|---|---|--|---------------|-----------------------------|
| Save the Rhino International                                      | Lolesha Luangwa                           | Supplementing traditional protected area management and security measures with a conservation education program, called Lolesha Luangwa, to raise awareness and a sense of ownership and responsibility towards rhinos' survival in Zambia.  | Zambia        | Black Rhinoceros            |
| Sea to Shore Alliance   | African Manatee Research and Conservation | Collecting critically needed data to increase understanding of African manatee populations in Senegal. Building capacity to enable grassroots conservation actions for African manatees through a collaborative network of African researchers in 18 countries. Providing support for research, training, equipment, and educational materials, and empowering biologists to advance scientific knowledge and long-term conservation capacity of this vulnerable species in their countries. | Senegal       | African Manatees            |
| Sea Turtle Conservancy (STC)                                      | Archie Carr Refuge Education Program      | Using hands-on educational activities to teach residents and visitors about their link to sea turtle survival and the health of coastal ecosystems. Working with partners to gather data about migratory movements of turtles nesting in the Archie Carr Refuge. Hosting events, summer eco-camps, guided turtle walks and public workshops conducted at the Barrier Island Center.  | United States | Multiple Sea Turtle Species |
| Smithsonian National Zoological Park                              | Shade Coffee, Insects and Birds           | Making managed lands as biodiversity-friendly as possible by researching which species of shade trees provide the most insect resources for migratory and resident birds in coffee farms. Helping growers to select tree species that enhance the habitat quality of their shade coffee farms for birds and other wildlife.  | Nicaragua     | Wood Warblers               |
| Snow Leopard Conservancy (Care of: Wildlife Conservation Network) | Community Stewardship of Snow Leopards    | Reducing potential for human-wildlife conflict, providing data to support conservation efforts, increasing conservation awareness, and enhancing environmentally-friendly enterprises in communities in and near Jigme Dorji National Park in Bhutan. Hosting an annual Snow Leopard Jomolhari Mountain Festival in partnership with the education program, and setting up model homestays in two villages to help locals tap into tourism as an income source.                              | Bhutan        | Snow Leopards               |

|--|--|--|--------------------|---------------------|
| Southern California Mountains Foundation                             | Great Seeds Restoration Program                  | Educating youth through experiential learning by engaging students in working alongside staff to restore high impact forest areas, assist in greenhouse management, seed collection, germination and out-planting in the San Bernardino National Forest. Collaborating with community, corporate, state and federal partners to support long-term efforts and commitment to educating youth while restoring the forest.  | United States      | Plants              |
| Spectacled Bear Conservation Society (Care of: San Diego Zoo Global) | Community Conservation of Andean Bears           | Collecting data on a unique population of Andean spectacled bears in tropical dry forests of northern Peru. Working with communities on education, engagement, and capacity building.  | Peru               | Spectacled Bears    |
| The Altai Project/Earth Island Institute                             | Community-led Snow Leopard Conservation          | Engaging an indigenous village in restoration of the snow leopard population in Altai, Russia. Working with herders and reformed poachers engaged through last year's work to protect snow leopards in the Argut basin. Offering incentives, employment, training for conservation, and teaching village families the value of these cats through a festival and outreach.   | Russian Federation | Snow Leopards       |
| The Marine Mammal Center   | Hawaiian Monk Seal Healthcare Project            | Establishing a state-of-the-art Hawaiian monk seal rehabilitation, research, and education program to promote monk seal population recovery and inspire the local community to protect and ensure the future of this critically endangered species.  | United States      | Hawaiian Monk Seals |
| The North Carolina Zoological Society                                | Schools UNITE for Kibale's Chimpanzees           | Conserving wild areas in and around Kibale National Park by inspiring the next generation of Ugandan conservationists and fostering an appreciation of nature and wildlife in rural communities. Collaborating with the Ngogo Chimpanzee Project and the Max Planck Institute for Evolutionary Anthropology to create a conservation education program rooted in solid science. Offering six teacher training workshops in Uganda and providing field trips for more than 1,000 school children. | Uganda             | Chimpanzees         |
| The Peregrine Fund   | Community Education for Harpy Eagle Conservation | Combining education, research, and conservation actions to benefit eagles, tropical lowland forest biodiversity, and the indigenous human communities who share the forest. Improving harpy eagle survival and productivity by reducing threats of hunting and deforestation through community education, involvement in sustainable forest management and long-term eagle protection.   | Panama             | Harpy Eagles        |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name  | Project Name  | Project Description   | Country            | Species               |
|--|---|---|--------------------|-----------------------|
| The Peregrine Fund   | Maasai Mentors for Vulture Conservation             | Inspiring Maasai youth in Kenya to embrace a conservation culture and a respect towards wildlife to help reduce the poisoning of vultures and carnivores. Offering practical hands-on solutions, creating opportunities for learning, and assessing the knowledge and attitudes of youth towards vultures and carnivores.                                 | Kenya              | Vultures              |
| The Peregrine Fund   | Philippine Eagle Conservation                       | Conserving Philippine eagles through community-based conservation of habitat in critical nesting territories, changing human behavior toward eagles, and informing government policies and forest management.   | Philippines        | Philippine Eagles     |
| The Purple Martin Conservation Association                 | Connecting Songbird Conservation Across Hemispheres | Determining global migratory connections of the purple martin songbird among North American breeding sites, Mexican and Central American migration sites, and South American wintering sites. Using data to aid in coordinated research and education programs to achieve whole life-cycle conservation of this declining species.                        | Global             | Purple Martins        |
| The University of Georgia Research Foundation              | Establishing Viable Blanding's Turtle Populations   | Establishing a new viable population of Blanding's turtles through reintroduction and increasing the number of successful populations in New England by 50 percent. Partnering with local schools and the U.S. Fish & Wildlife Service to head-start juvenile turtles and release hatchlings each year.   | United States      | Blanding's Turtles    |
| The Wetlands Institute                                     | Jersey Shore Terrapin Conservation Project          | Continuing long-term diamondback terrapin research, conservation, and training undergraduate college students. Reducing turtle bycatch in blue crab traps through volunteer engagement, rescuing terrapin hatchlings from storm drains through community involvement, and distributing terrapin-based learning modules developed for grades K-8 students. | United States      | Diamondback Terrapins |
| Tigris Foundation (Care of: Wildlife Conservation Network) | Changing Local Attitudes Towards Tigers             | Identifying and effectively engaging Russians utilizing the tiger range who might come into contact with Amur tigers in the forest. Affecting behavioral change with a social survey and educational campaign to promote conservation.  | Russian Federation | Amur Tigers           |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name   | Project Name   | Project Description  | Country   | Species                                       |
|---|--|--|-----------|---|
| Toledo Institute for Development and Environment (Care of: Philanthropic Ventures Foundation)                         | Community Participation in Conservation Research   | Training and employing young people as researchers to conduct environmental monitoring to inform protected area management and act as "ambassadors for conservation" in the Maya Mountain Marine Corridor of southern Belize. Developing a "level two community researcher" course and training 10 emerging Belizean conservationists, building stewardship and facilitating valuable conservation research.   | Belize    | Central American River Turtles                |
| TREE Foundation   | Continue Existing Sea Turtle Conservation and Reinforce Community Involvement Within the Extended Region | Reinforcing community conservation involvement in Tamil Nadu, India where poaching turtles is rampant, maintaining and strengthening ongoing community based turtle conservation with artisanal fishers, working alongside trawl fishers to reduce bycatch mortality, standardizing methodologies for the state through workshops, and archiving data and developing a comprehensive conservation action plan. | India     | Olive Ridley, Hawksbill and Green Sea Turtles |
| TSA India (Care of: Turtle Survival Alliance Foundation)  | India Turtle Conservation Program  | Optimizing captive breeding of the critically endangered black softshell turtle in temple ponds in Assam, Northeast India, through breeding and raising improvements and the expansion of the headstarting facility at Nagshankar temple. Establishing a reintroduction protocol to aid in the recovery of remaining populations.  | India     | Black Softshell Turtles                       |
| Turtle Survival Alliance Foundation   | Central American River Turtle Conservation   | Investigating the reproductive biology of the critically endangered Central American River Turtle, and developing protocols to improve captive reproduction that will aid in restoring depleted wild populations.  | Belize    | Central American River Turtles                |
| Universidad Nacional Del Centro De La Provincia De Buenos Aires (Unicen) (Care of: Wildlife Health Center Foundation) | Community Guardians for Argentine Wetlands   | Using annual waterfowl counts in Argentina to stimulate people's natural curiosity and inspire them to become stewards of their natural resources. Researching waterfowl and ecosystem health to provide critically needed data for the sustainable management of wetlands.  | Argentina | Andean Flamingos                              |
| University of Alberta (Care of: International Association for Bear Research and Management)                           | Southwest Alberta Grizzly Bear Monitoring  | Engaging the southwestern Alberta community in grizzly bear monitoring, while simultaneously working with community members to reduce conflict between ranchers and grizzly bears.   | Canada    | Grizzly Bears                                 |
| University of British Columbia (Care of: American Foundation for the University of British Columbia)                  | Initiating Seahorse Conservation in China  | Determining seahorse distribution and vulnerability in China and engaging local people in a global citizen science venture to protect these fish. Identifying seahorse populations and deploying conventional methods and social media to increase public engagement with seahorse conservation.   | China     | Seahorses (about 13 species in China)         |

| Organization Name   | Project Name                                   | Project Description  | Country      | Species                        |
|---|--|--|--------------|--------------------------------|
| University of Hawaii Foundation   | Connecting Coral Reefs Year 2                  | Using population genetics to understand reef recovery and connectivity of the marine protected area of Palau's barrier reef in the Western Pacific Ocean. Leveraging results from the assessment to provide guidance in the design of marine protected areas globally.   | Palau        | Acropora hyacinthus            |
| University of Miami/Rosenstiel School of Marine and Atmospheric Science | Tiger Shark Ecology and Biology                | Evaluating the relationship between shark reproduction, condition and movements and how these patterns may be impacted by tourism and fishing pressure. Creating educational and outreach materials to promote awareness for the conservation needs and solutions for the Atlantic tiger shark, and generating data that will allow policy makers to make informed management decisions with respect to the conservation of the species.   | Bahamas      | Tiger Sharks                   |
| University of Wisconsin Foundation                                      | Sloth Conservation and Shade-grown Agriculture | Determining if and how shade-grown farms promote the populations of two- and three-toed sloths in Costa Rica. Building on a 4-year study involving more than 400 marked sloths, and expanding an education program to raise awareness about sustainable agriculture.   | Costa Rica   | Two-toed and Three-toed Sloths |
| University of Wyoming   | The Hirola Conservation Project                | Examining whether the conversion of grassland to woodland in eastern Kenya has made hirola, the world's most endangered antelope, vulnerable to predation. Informing hirola conservation efforts by identifying the management interventions most likely to reverse population decline, and identifying suitable sites for reintroduction.   | Kenya        | Hirola                         |
| Vancouver Aquarium  | Advancing Local Sustainable Seafood Markets    | Working with restaurants to make choosing ocean-friendly options easy for consumers. Addressing two challenges facing current sustainable seafood programs: a lack of mid-lower price range restaurant participants, and a substantial level of locally sourced seafood that is not finding a local market. Progressing the seafood supply model to the next level of sustainability and increasing its mainstream availability in Canada. | Canada       | Multiple Fish Species          |
| Wild Bird Trust (Care of: World Parrot Trust USA)                       | Cape Parrot Project                            | Restoring degraded Afromontane forest patches in South Africa to reduce threats to the Endangered Cape Parrot. Establishing protected areas and sanctuaries, developing novel parrot conservation tools, combating disease outbreaks, building nest boxes and participating in youth education.  | South Africa | Cape Parrots                   |

|--|--|--|-------------------|-------------------------------------|
| WildAid  | Manta Conservation in Peru                               | Combining ecological research, education and outreach, and a novel program that supports alternative livelihoods for fishermen to generate support for manta ray conservation in Peru at the local and governmental levels. Working toward national protection for manta rays in Peruvian waters with support from local communities who embrace sustainable ecotourism as an alternative to fisheries for manta rays. | Peru              | Oceanic Manta Rays                  |
| WildAid  | Reducing Demand for Rhino Horn                           | Raising awareness of the rhino-poaching crisis through public awareness campaigns in Vietnam and China featuring popular celebrities. Measurably reducing the demand for rhino horn by supporting Vietnamese lawmakers in banning rhino horn sales and increasing enforcement efforts.   | China             | Black and Southern White Rhinoceros |
| Wildlife ACT Fund Trust (Care of: The Barry and Patricia Wakeman Education Foundation) | Tembe-Ndumo Community Rhino Conservation                 | Improving the chances of survival for the critically endangered black rhinoceros in Tembe Elephant Park and Ndumo Game Reserve, South Africa. Teaching endangered species conservation lessons in schools and communities bordering the reserve and operating a conservation education bush camp for children from these communities.  | South Africa      | Black Rhinoceros                    |
| Wildlife Alliance  | Wildlife Protection Through Continued Community Outreach | Engaging Cambodian communities in wildlife protection and raising awareness among rural residents regarding the devastating effects of the illegal wildlife trade. Promoting a conservation ethic and increasing awareness about Cambodia's wildlife laws and Wildlife Alliance's nationwide wildlife rescue hotline numbers.  | Cambodia          | Pileated Gibbons                    |
| Wildlife Conservation Society  | Mbeli Bai Gorillas                                       | Improving knowledge about the Western lowland gorilla and its conservation status through applied research and national capacity building in the Republic of Congo. Raising awareness internationally and providing local community outreach programs.   | Republic of Congo | Western Lowland Gorillas            |
| Wildlife Conservation Society  | Patagonian Andean Cats and Herders                       | Reducing the conflict between scattered herders and Patagonian Andean cats by employing non-lethal methods to deter predation and offering economic incentives for herders who agree to live peacefully with small cats.   | Argentina         | Andean Mountain Cats                |

2014 Disney Worldwide Conservation Fund Annual Conservation Grants

| Organization Name                                   | Project Name                              | Project Description  | Country              | Species                          |
|---|---|--|----------------------|----------------------------------|
| Wildlife Conservation Society                       | Reintroduction of Chinese Alligators      | Assessing three wetlands in the Anhui Province of China as potential reintroduction sites for captive-bred Chinese alligators. Visiting each site to assess the need for habitat modifications, the potential for human-alligator conflict, and support among local communities for alligator conservation.  | China                | Chinese Alligators               |
| World Parrot Trust USA                              | Parrots, People, Trees and Trails         | Applying integrated population monitoring of the endangered Yellow-shouldered Amazon Parrot in the Caribbean and focused scientific research to guide conservation management actions, aiming to cultivate positive attitudes towards the parrot through realizing the economical opportunities of nature-based tourism, and continuing to expand habitat restoration efforts. | Netherlands Antilles | Yellow-shouldered Amazon Parrots |
| Xerces Society                                      | Bring Back the Pollinators Campaign       | Combining research on how to best protect and restore the habitat of pollinating insects with education and training to implement habitat conservation projects in the United States.  | United States        | Insects                          |
| Zoo Conservation Outreach Group (ZCOG)              | Giant Armadillo Conservation Project      | Understanding the biology and behavioral ecology of the highly endangered Giant Armadillo in Brazil through radio tracking, camera trap monitoring, and direct observation data. Promoting an advance in both habitat and biodiversity preservation through environmental education and media campaigns.   | Brazil               | Giant Armadillos                 |
| Zoological Society of London (Care of: ZSL America) | Angel Shark Conservation Programme (ASCP) | Informing the sport fishing community in the Canary Islands about catch and release techniques involving the critically endangered angel shark. Developing a tag and release project, and reporting sightings to provide vital information for the conservation of this species.   | Spain                | Angel Sharks                     |
| Zoological Society of London (Care of: ZSL America) | Conserving the Pygmy Sloth                | Developing a participatory conservation management plan for the pygmy sloth and the island of Escudo de Veraguas in Panama. Working with key stakeholders and young people to develop awareness campaigns, encouraging sustainable resource use, and monitoring the sloth population.  | Panama               | Pygmy Three-toed Sloths          |
